THE CYNON VALLEY PARTY COMMIT TO THE FOLLOWING:

OUR YOUNG PEOPLE:

The Cynon Valley Party promise to fight for better opportunities and rights for young people. In particular, we will campaign and actively search for ways that will bring 21st-century employment and training to our area. Robotics, engineering, space technology, tourism, software, 3d-printing, medicine & healthcare are all areas of growth which need encouraging. This starts by changing attitudes in colleges and government to better facilitate future employment paths.

Unless the area adapts now, then our talented young people will leave and abandon this area.

The Cynon Valley Party will fight for adequate youth provision in our area. The young people of the Cynon constituency have been neglected for too long.

OUR ENVIRONMENT:

The Cynon Valley is a great place to live, work, enjoy and spend time. We are close to major cities, the coast, the Brecon Beacons National Park, we have clean air and clean rivers. The Cynon Valley Party is passionate about looking after our environment. We believe in supporting clean, sustainable, low impact and, where possible, locally owned utility companies. We will lobby, fight for and encourage respectful and appropriate environmental development.

With considerate planning and development, we believe that the Cynon Valley and it's immediate environment will encourage, business, culture and community to thrive as well as entice new visitors to our area.

OUR ECONOMY:

The daily A470 exodus needs to stop and the High Street needs support, direction and a new way of doing things to become revitalised. The CVP has been fighting for and will continue to fight for investment in our town centres. We will do all we can to aid job creation in our area. The Cynon Valley Party will support the current Aberdare Town Centre Business Improvement District (BID) and also create a cross-party working group to focus on other town centre initiatives. We will work with businesses and investors to enable new enterprises in our area that are fit for the 21st century and beyond.

In the near future, the world of work will change drastically and The CVP believes that our area should prepare for predicted future employment trends. This indicates more home working, less commuting, modern smaller industrial areas and high-speed communications. The Cynon Valley Party has the vision, character and knowledge to lobby and foster partnerships for our future economy. The Planetarium of Wales, Zip

World and the proposed Welsh Conservation Centre of Excellence earmarked for Hirwaun are just the start of a new ambitious mix which will inject millions of pounds into the economy. We will support these, and more visionary schemes.

OUR EDUCATION:

It is unacceptable that our schools are falling behind and our children's futures are being compromised. It is unacceptable for the students, it is unacceptable for the parents and it is unacceptable for the staff that are entrusted with a sometimes unappreciated duty.

A culture change needs to be encouraged. A change needs to come that embraces the education system but also engages parents, students and educators to become vital cogs in our communities. The Cynon Valley Party have first-hand experience of schools and colleges adopting an arms distance approach to deep community involvement. The Cynon Valley Party believe that community service is a duty and that our education system has an obligation to facilitate this. We will work with all stakeholders to implement long-lasting and meaningful partnerships in our area.

OUR HEALTH & WELL BEING:

The Cynon Valley Party is astonished at how Cwm Taf Health Board has accumulated the problems that have recently come to light. We believe that the staff and public deserve a

well funded and world-leading health service that is fair and free for all. We will fight to, not only save, but improve the NHS.

OUR SECURITY

There are no manned Police stations in the Cynon constituency. This is unacceptable. We will lobby and demand a visible and accessible Police presence from our Police Authority, Local Government and Nationally.

We believe that our armed forces and service personnel deserve adequate resources and funding as well as political and moral support in an ever uncertain world. The Cynon Valley Party also believe that a more considered approach by the UK government when entering into conflict is necessary.

YOU CAN MAKE A DIFFERENCE

The Cynon Valley Party will continue to fight for a fairer deal for our Cynon constituency. We need you to stand up and join our movement. Once the general election is over, The Cynon Valley Party will be here to campaign and fight for the Cynon constituency at local council elections. If you are (or know) someone who is community-minded and can help make a positive difference in your area then consider standing for council. Get in touch and find out how you can help.
